CAREER OBJECTIVE

Computer Science graduate with hands-on experience across full stack web development (Java, Spring Boot, React.js, Node.js, MySQL) and machine learning (Python, TensorFlow, Keras). Completed two internships and built five independent projects spanning authentication systems, booking platforms, CRUD applications, and image classification. Seeking a software developer role where I can apply my problem-solving skills, adapt quickly to new technologies, and contribute to building reliable, scalable software.

EDUCATION

B.E., Computer Science and Engineering <i>Government College of Engineering, Erode CGPA: 8.4</i>	2022 – 2026
HSC (Class XII) <i>Government Higher Secondary School, Murarbad 88.6%</i>	2021
SSLC (Class X) <i>Government Girls High School, Murarbad 85.2%</i>	2019

TECHNICAL SKILLS

Languages: Java, JavaScript, Python
Web Technologies: HTML, CSS, React.js, Spring Boot, Node.js, Express.js, JSP
Database: MySQL
Machine Learning / Deep Learning: TensorFlow, Keras, OpenCV, NumPy
Tools: Git, GitHub, VS Code, Eclipse

PROJECTS

Parking Slot Management System | *Spring Boot, JSP, MySQL*

Built a system to automate parking slot allocation, booking, and release, with real-time availability tracking and conflict handling to prevent double-booking when multiple users targeted the same slot.

Student Information Management System | *Spring Boot, JPA, JSP, MySQL*

Developed a full stack CRUD application for managing student records with secure login authentication, session handling, and a database schema mapped using JPA.

E-Commerce Website | *HTML, CSS, JavaScript*

Built a responsive front-end for product browsing and shopping cart functionality, with smooth cart state management and page navigation across devices.

Cat vs Dog Image Classification | *Python, TensorFlow, Keras, OpenCV, CNN*

Built a CNN-based binary image classifier using a 3-layer Conv2D and MaxPooling architecture with dropout to reduce overfitting. Trained the model on augmented image data using Keras ImageDataGenerator and built a prediction pipeline with OpenCV for preprocessing and Matplotlib for visualization.

INTERNSHIPS

MERN Stack Intern — Virtual Tech Services, Chennai

Jan 2026 – Mar 2026

Built a full stack Vehicle Service Booking Platform enabling users to register vehicles, book service appointments, and view booking history. Developed the frontend using React.js and backend REST APIs using Node.js and Express.js, and owned end-to-end database design connecting booking, vehicle, and history data.

Full Stack Development Intern — Incrix Techultions LLP

Jun 2025 – Jul 2025

Developed responsive UI components using HTML, CSS, and JavaScript, and integrated backend services using Java, Spring Boot, and MySQL. Debugged application errors, improved performance, and collaborated with the team to deliver assigned modules on schedule.

CERTIFICATIONS

Python for Data Science — NPTEL
Programming in Java — NPTEL
Introduction to MS Excel — Simplilearn
Problem Solving (Basics) — HackerRank

Soft Skills: Problem Solving, Teamwork, Time Management, Adaptability, Quick Learning
